Water is LIFE and Hydrogen-Rich Ionized Alkaline water means a HEALTHY LIFESTYLE.

NOURISHING HEALTHY LIFESTYLE

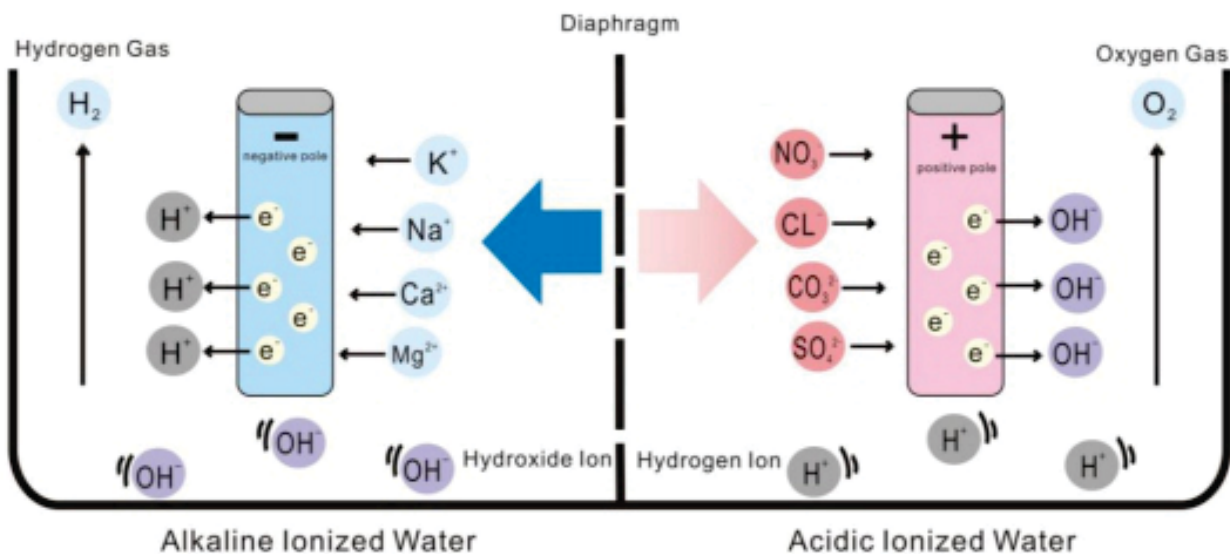

The importance of nature and how much it affects human life is under-rated. There have been many researches that have proven that exposure to nature can reduce complications in the body and can improve health. The very existence of humans is based on what we get from nature. To lead a healthy life, we all require Mineralised Alkaline drinking water, clean air filled with oxygen and Healthy nutritional food. Preserving nature would mean to nourish healthy life. Our actions and interactions with Mother Nature is what facilitate healthy living. And Mother Nature survives when it gets healthy water. Healthy water, thus, is the most essential source that neither humans nor nature can live without. Pure and healthy water is the basis on which everything revolves.

What is ionized Water?

By electrolyzing the clean tap water, which is filtered and sterilized to reach the drinking water standard, we can get IONIZED WATER.

There are two kinds of ionized water : Alkaline Water and Acidic Water.

Alkaline ionized water has many health benefits and Acidic ionized water has good performance in Sterilization.

WHAT IS HYDROGEN WATER?

Hydrogen water or hydrogen-rich (Also called hydrogen Enriched water) Than normal water (H_2O), it contains dissolved hydrogen gas (H_2). For Example, Have carbonated water or beverages (Soda Pop), containing dissolved carbon dioxide gas (CO_2), or Oxygenated water, which contains dissolved oxygen gas (O_2). Similarly, you can have water in which there dissolved hydrogen gas.

DOESN'T WATER ALREADY CONTAIN HYDROGEN BECAUSE WATER IS H_2O ?

A water molecule consists of two hydrogen atoms, Which are chemically bonded to an oxygen atom. This difference from the hydrogen gas molecule (H_2), Which is simply two hydrogen atoms bonded to each other.

For Example: We need oxygen (O_2) to live, so why can't we just get our oxygen from drinking water, H_2O ? This is because oxygen is chemically bound to the water molecule. We need available oxygen gas (O_2) which is not bound to other atoms or molecules. In the same way, for dissolved hydrogen gas (H_2) to benefit us, it must be in an unbound, and therefore available the therapeutic benefits.
