

Alkion Alkaline Ionized Water from Kenkojal is an electrolysis based innovative water technology that sterilizes tap water and produces alkaline as well as acidic waters in this process.

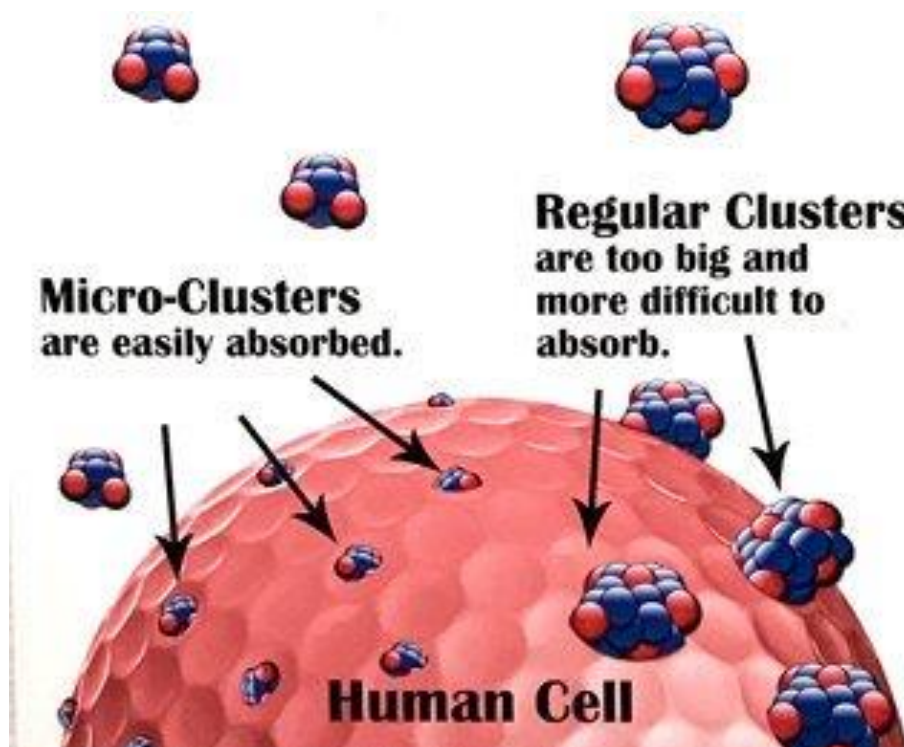

Regular water purifiers can be used only as a drinking water source. Alkaline ionizer on the other hand is a device that augments regular water into Micro clustered, Anti Oxidant, Alkanized & Acidic water - enhancing healthcare and enriching your lifestyle.

Why Alkion Alkaline Ionizers?

Alkion Kenkojal offers best in class 7-plate, 9-plate, and 11-plate home alkaline ionizers as well as commercial alkaline ionizers. Alkion Kenkojal also has Ion-Exchange Membrane Based exclusive hydrogen water generators. Alkion's forte in customized domestic and commercial water purifiers gives their engineers the edge and expertise to help you chose the best machine for your health and lifestyle needs.

What is the biomedical concept of Alkaline Ionizers?

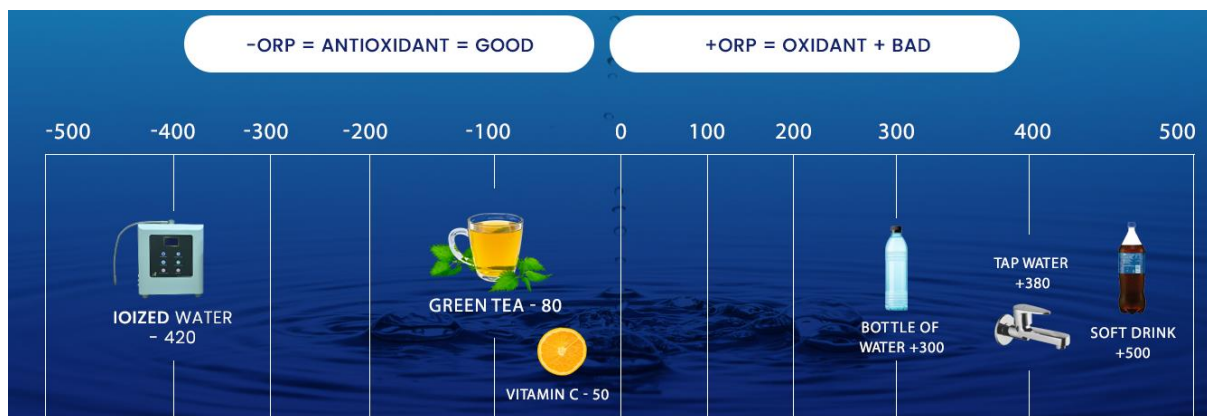

Micro clustering: Ordinary water has large molecular clusters of 15 to 20 H₂O molecules. Ionization process alters water clusters into 4 to 5 molecules. These smaller clusters enable water to penetrate the cell membranes much easily.

Micro Clustering thus helps Oxygenate, Hydrate, Nourish and Detoxify even deep cells of our tissues very effectively.

As more water reaches our deep tissues, it aids in removal of trapped toxins and edema efficiently. This helps resolve inflammation from toxic irritants and swelling swiftly.

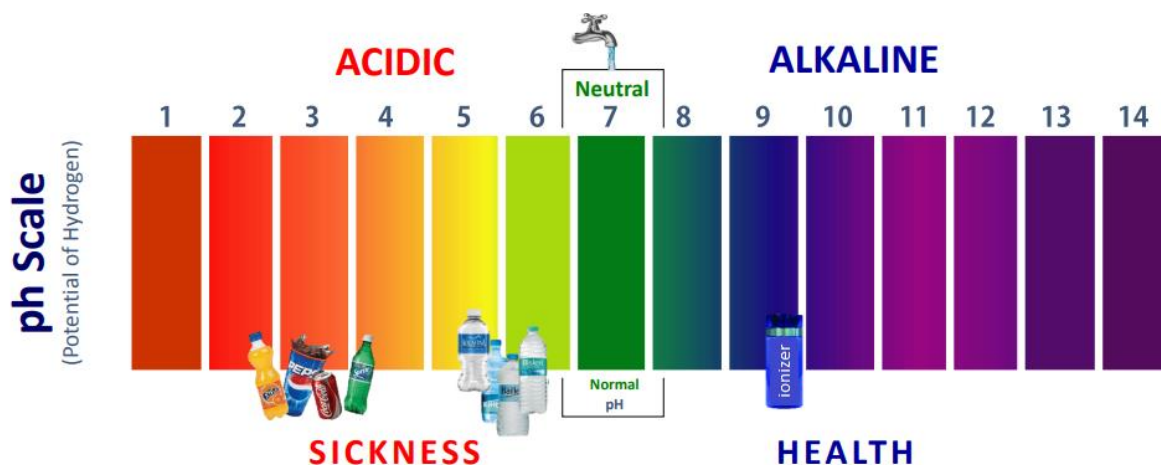

Anti Oxidation: Free radicals attempt to steal free electrons from stable molecules, thus damaging the stability of molecules in normal body tissues. Antioxidants combine with harmful molecules called free radicals and destroy their damaging capabilities. Though free radicals are naturally produced during daily cellular metabolism, the condition is made worse for urban humans due to pollution, smoking, radiation, acidic beverages, cosmetics, processed foods, aging, lifestyle, and stress.

Antioxidants neutralize unstable harmful molecules known as free radicals and terminate the chain reaction of oxidation preventing damage to healthy cells. Cells function poorly or undergo gradual degeneration due to oxidation.

Alkalinity: Alkalinity is the normal state of a healthy person (PH 7.4), but our body tends to be acidic due to acidic diet, stress, and environmental toxins.

Alkaline Ionized Water helps body in maintaining a healthy PH. Disease grows in acidic & hypoxic tissue, whereas disease cells cannot survive in an alkaline environment.

Alkion Kenkojal Alkaline Ionizer enhances your regular drinking water with loads of free hydrogen molecules, four levels of alkaline water, one level of purified water, and three levels of acidic water to choose from. Alkion Kenkojal Alkaline Ionizer has an auto-clean mechanism ensuring long life of the machine.

How does Alkaline Ionizers impact your body?

Powerful Antioxidant

Alkion Kenkojal Hydrogen Water serves as an effective antioxidant. It neutralizes harmful free radicals in the body, protecting cells from damage that can lead to aging and various chronic diseases, such as cancer and heart disease.

Promotes Skin Health

The antioxidant properties of Alkion Kenkojal Hydrogen Water promotes skin health by aiding in hydration of skin tissues, reducing wrinkles and energizing the skin. It protects the skin from premature aging effects due to environmental pollutants, stress, and UV radiation, maintaining youthful, hydrated and radiant skin.

Boosts Energy Levels

The molecular hydrogen in Alkion Kenkojal Hydrogen Water optimizes mitochondrial function—the powerhouse of cells—promoting increased energy levels that can offset body fatigue as well as mental stress.

Enhances Digestive Health

Alkion Kenkojal Alkaline Water supports digestive health by mitigating oxidative stress in the gastrointestinal tract. This can lead to improved gut health, reducing symptoms of conditions like acid reflux and irregular bowel movements.

Aids Tissue Recovery

Alkion Kenkojal Hydrogen Water is known for its potent anti-inflammatory properties. It can accelerate recovery from physical exertion, injuries, and post-workout soreness by reducing inflammation and improved blood flow. Regular consumption can also help gradually manage chronic inflammatory conditions; such as arthritis, skin conditions, renal function, by providing consistent and systemic relief.

Alleviates Allergies

For those suffering from allergies, Alkion Kenkojal Ionized Water can offer relief by reducing allergic reactions. Its anti-inflammatory properties help calm the immune system's response to allergens.

Detoxification

Alkion Kenkojal Hydrogen Water enhances the body's detoxification processes by supporting the liver and kidneys in flushing out toxins. This not only improves overall health but also boosts the immune system's effectiveness.

Supports Cardiovascular Health

The anti-inflammatory and antioxidant effects of Alkion Kenkojal Hydrogen Water contribute to cardiovascular health by helping to reduce blood vessel inflammation and lower cholesterol levels, which are essential for preventing heart disease.

By integrating Alkion Kenkojal Hydrogen Water into your daily routine, you're not just hydrating—you're actively enhancing your health. Experience the powerful benefits of reduced inflammation, improved energy, and better overall well-being that Alkion Kenkojal Hydrogen Water generators provide.
